2,022 IN 2022!

Dear Paula,

Through community collaborations and partnerships, magic happens! A synergy of likeminded efforts to achieve a common goal by combining resources, has resulted in **Laptops 4 Learning** being able to provide a whopping 47% increase in the number of students who received a laptop in calendar year 2021. This incredible feat could absolutely not have been possible without the grant from **Arizona Women's Partnership**, in support of closing the digital technology divide for students and military service veterans. Your donation, combined with grants and donations from other donor partners, resulted in over 1,060 students being provided with their own personal laptop.

The more funds **Laptops 4 Learning** receives through grants and donations, the greater the impact **L4L's** program can have in providing laptops to the many students and veterans without one. **Laptops 4 Learning** encourages those who can pay the affordably priced cost of \$205 for Chromebooks and \$265 for Windows laptops, to do so. Whatever a student can afford to pay is encouraged. This is how we *stretch* the funding you provide to us, in order to accommodate the needs of greater number of students.

Laptops 4 Learning's 2022 goal is to provide a minimum of 2,022 students with laptops. While this may sound ambitious, it is very doable with your continued support. Please refer any students you may be aware of who need a laptop to our website, www.laptops4learning.com/students, and have them register. Help us to go to even higher heights in 2022 to close the digital technology divide for low income students, by helping provide those who need a laptop with a device of their own. Their success in school and life depend greatly on having personal access to this essential technology tool. General fund donations can be made by going online to www.laptops4learning.com/donations.

Again, we thank **AZWP** for embracing **Laptops 4 Learning's** operating maxim that, "NO student should be denied a laptop because of cost". Enclosed are souvenir mousepads depicting students who have benefitted from your generosity in 2021. Please share with your staff. On behalf of the 1,060 students who now are better positioned to succeed in school and life, we gratefully say **THANK YOU!!**

Best regards,

Brenda Powell
